A Bibliography of the Lobsters, Genus Homarus

By

R. D. LEWIS, Fishery Biologist

Bureau of Commercial Fisheries Biological Laboratory
West Boothbay Harbor, Maine 04575

ABSTRACT

A total of 1,303 references are given.

INTRODUCTION

This bibliography was begun in the summer of 1964. It was mimeographed and distributed at a meeting of United States and Canadian scientists concerned with the biology of the American lobster held on November 9-10, 1965, at the Bureau of Commercial Fisheries Laboratory, West Boothbay Harbor, Maine.

References in the 1965 manuscript were compiled from the original papers, their citations, and the bibliographies of Herrick (1911), Scattergood (1949), and Dawson (1954). The present list also includes references from the bibliography of Bergeron (1965).

About 80 percent of the references were found in the library of the Marine Biological Laboratory at Woods Hole, Mass., and the rest at the libraries of the Fisheries Research Board of Canada, Biological Station, St. Andrews, New Brunswick; the Bureau of Commercial Fisheries Biological Laboratory, West Boothbay Harbor, Maine; and the Department of Interior Library and the Library of Congress, Washington, D.C.

Lists of references that I had overlooked in the 1965 manuscript were provided by H. J. Thomas, Department of Agriculture and Fisheries for Scotland, Marine Laboratory, Aberdeen; D. G. Wilder, Fisheries Research Board of Canada, Biological Station, St. Andrews, New Brunswick; and R. J. Ghelardi, Fisheries Research Board of Canada, Biological Station, Nanamio, British Columbia. The library staffs of the Marine Biological Laboratory at Woods Hole and the Biological Station at St. Andrews assisted me.

As the Nation's principal conservation agency, the Department of the Interior has basic responsibilities for water, fish, wildlife, mineral, land, park, and recreational resources. Indian and Territorial affairs are other major concerns of America's "Department of Natural Resources."

The Department works to assure the wisest choice in managing all our resources so each will make its full contribution to a better United States -- now and in the future.
